Good morning....

How are you doing on compiling your data from the Dimock visit? I am trying to figure out the apparent failure of one of the treatment systems and could really use the numbers you recorded.

thanks
Rich

Greetings & Namaste – Rich,

It was indeed a great pleasure meeting and working with you.

Indeed all is well. Hope you had some relaxing time with your family over the holiday last week. I had taken Thurs & Friday off to spend time with my family.

As we speak, I am working on organizing my notes and data. I will get it to you as soon as it is ready, in a couple of days.

I will call you on Thursday.

Thanks

Namaste 

Hope all is well.

I need the data you collected during our field activities at Dimock. We seemed to have gotten wildly different concentrations of Mn in our treated samples so I am forensically now trying to figure out an explanation. The methane is not critical for now. I am mostly interested in temperatures and other measurements you recorded at the taps and by pass and well head.

Could you please as soon as possible record your measurements into a spread sheet and forward them to me?

thanks, please give me a call if you want to talk about this whole endeavor.

Rich
